

Some scientist believe that mega-disasters are a natural part the of the Earth's heritage.

Experts have investigated archaeological records, applied forensic science, and used computer modelling and field tests to explain how and why these events could actually have happened. Biblical Mysteries Explained is a three-part series by Discovery TV that explores the greatest events of the Bible and has revealed new scientific discoveries and proclaims that natural mega-disasters are part of the earth's heritage. Super-volcanoes, asteroid strikes, global warming and polar ice-melt have happened in the past and will happen again and were recorded by early man in folk legends, in primitive myths, in ancient chronicles and in the Bible itself.

Lost Gospels: The lost books of the Bible taken from the desert of Egypt to the labs of the Smithsonian Institution to uncover the secrets of the banned gospels of Mary Magdalene Peter the Apostle, and Judas Iscariot.
